

Running Malware Bytes to Keep your Computer Clean

Please run this once a week if you search the Internet a lot. Have it connected to the Internet if possible. This will keep a lot of JUNK off of your computer that it gets when searching anything.

- Double click Malwarebytes Icon on your Desktop
- Put a dot in Perform Full Scan
- Click SCAN
- Click C: drive
- Let it scan—it will take a while (according to how much is on your computer)
- If nothing is found, it will say “The scan completed successfully. No malicious items were detected, click Main Menu”. and you are finished.
- If something was found, make sure the boxes have checks in them and click Remove or Delete (whichever you are prompted to do). This will remove the junk that it found during the scan.
- If you have any questions, call us.
